

Built for Energy & Power. Performance That Endures.

Energy and power equipment require clear, durable identification that lasts through decades of operation. Backed by more than 35 years of durable label expertise, IDENTCO delivers identification solutions engineered for harsh operating environments. IDENTCO energy and power labels preserve critical equipment identification to simplify asset management and improve long-term asset reliability.

MULTIPLE MATERIAL AND SIZE OPTIONS AVAILABLE!

Features & Specifications

- UV-resistant materials engineered for long-term exposure
- Excellent abrasion, moisture and heat resistance
- Low surface energy performance for challenging surfaces
- Designed for variable data, barcodes and serialized identification
- Materials selected to help maintain legibility throughout equipment life

Proven Performance

- Fulfill compliance requirements with in-house testing and qualification
- Improve asset tracking and maintenance across complex networks
- Meet safety and regulatory identification requirements
- Standardize branding and labeling across facilities
- 35+ years protecting operational performance

The IDENTCO Energy & Power Product Portfolio

Customized for energy and power applications, IDENTCO's label portfolio combines durable materials and specialized constructions engineered for reliable identification, safety and uptime. Custom solutions are available in a range of sizes and formats to perform in demanding energy and power environments.

Attributes	TT312	CP3020
Specifications		
Indoor / Outdoor	Indoor	Indoor / Outdoor
Material	Vinyl Film	Vinyl Film
