

Built for Precision Masking. Proven in SMT Manufacturing.

Reliable masking is essential for protecting PCB surfaces throughout SMT manufacturing. Backed by more than 35 years of durable label and masking expertise, IDENTCO delivers masking solutions engineered for demanding electronics applications. Designed to withstand extreme heat, harsh chemicals and repeated wash cycles, our PT200 polyimide masking tape protects critical PCB surfaces, improves manufacturing efficiency and maintains circuit integrity.

MULTIPLE COLOR AND SIZE OPTIONS AVAILABLE!

Features & Specifications

- Performs up to 430°F
- Withstands multiple wash cycles
- Chemical, smudge, scratch and fade resistant
- Easily removable adhesive
- UL, cUL and PPAP approved

Proven Performance

- Heavy-duty silicone adhesive leaves no residue behind
- Built to withstand all SMT processes
- Manual or automatic application options
- Protect critical components and maintain circuit integrity
- 35+ years protecting operational performance
