

Q-SDS

OPTIMIZING SDS AUTHORIZING & GENERATION

While the GHS is global — over 80 countries have adopted it — the 700-page document is not harmonized in how it is applied. Our software, Q-SDS handles the complexity. It authors and generates custom GHS formatted safety data sheets to meet current and forthcoming US OSHA and world-wide requirements, and helps users manage hazardous chemicals and maintain a safe, healthy workplace.

Q-SDS provides a proven path for compliance

Our software is “battle tested.” Quantum has been selling SDS Authoring software since 1993. The easy-to-learn module dramatically cuts time spent with SDS by standardizing the management process and streamlining the authoring and generation procedure. The SDS Authoring and Generation module integrates with existing ERP systems and ensures automatic compliance with current chemical regulatory requirements.

Rapid Generation, Simple Workflow

Q-SDS helps you to reduce regulatory workload.

- Easily author with the Q-SDS template
- Simple, “enter-once” workflow
- Quickly generate complete SDS with just a few key entries
- Trade secret protection
- Multi-language / format generation
- Interfacing with ERP systems at multiple stages in the cycle

Q-SDS supports global regulation compliance

Our software, Q-SDS, is designed to help you:

- reduce your regulatory workload in authoring a valid SDS for each country in which you do business
- avoid customer complaints and fines due to badly documented or incorrectly classified products
- allow you to sell your product in any region in which you wish to do business

Easy Process

- Masked complexity with access to full detail
- Follow the step-by-step template

Increased Productivity

- Generate more SDS with complete accuracy in less time
- Easily access and print or send digital copies

Cost Savings

- Avoid fines for violations
- Easily generate SDS sheets and related labels in 38 different languages

Increased Productivity

- Meet the GHS spec and national chemical regulations
- Be confident with continual updates of regulations in Q-SDS

Quantum...immersed in EHS

For over thirty years, Quantum has served the EHS market with “no-hassle” software solutions that reduce risk and create cost-saving efficiencies in GHS compliance. What differentiates us is the combination of our understanding of the global chemical industry with our smart technology. We work with Fortune 500 companies as well as small to mid-sized corporations around the world. Our diverse team of safety professionals, talented developers, and managing leaders all work in sync to provide you a custom solution. Contact us today via info@usequantum.com to see how we might support you.
