

Q-SDS Service

DELIVERING THE ACCURACY YOU NEED

Quantum offers you the SDS Services you need to successfully create SDS for new products and manage updates to your current SDS.

With over 30 years of experience in generating SDS for customers around the world, Quantum SDS Services will cost-effectively meet your SDS needs. Choose from the following services:

Authorizing New SDS

Send us your formula with CAS, percent weight and physical properties and we'll generate your GHS compliant SDS.

Updating SDS

Get us a copy of your current SDS and we'll refresh it against all current regulations and confirm classification.

Reviewing SDS

We will review SDS that you have had in your portfolio or those you have been given to confirm compliance.

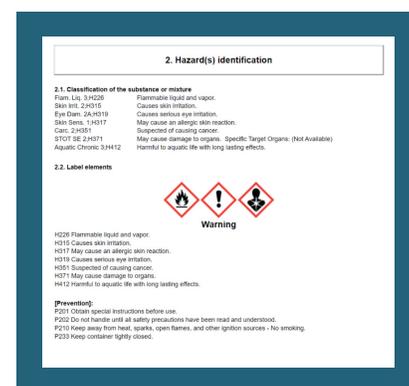

SDS for non-US Markets

Our experts and SDS Software can prepare an SDS for any legislation for countries in 6 continents and in 38 languages.

Consulting on SDS

We will work with you to develop a streamlined approach for developing and managing your SDS.

Compliance Guaranteed

Send us your old SDS, or formula and physical properties for a new product, and we'll author an SDS to the GHS standards. We have the expertise to author your SDS for any country. Remember, if you supply chemicals anywhere in the world, you will need a GHS SDS.

Q-SDS SERVICES

Quality Assurance Built In

Q-SDS Services from Quantum offer key advantages

EXPERTISE

Our team has been supplying SDS across industries around the world for over thirty years. And we've been studying GHS for over twenty, so we've got the experience to address any scenario.

CARE

Each document you send to us will be personally verified by at least two Hazard Communication Experts, each with more than ten years of GHS experience.

SPEED

Our SDS Authoring software allows our experts to more quickly revise or author documents, which in turn allows us to offer a high degree of care and expertise without sacrificing speed and affordability.

SECURITY

Quantum understands that your SDS may include proprietary information (such as mixture formulation) and will work with you to ensure that information remains secure. The output SDS belongs to you and you alone.

Quantum...immersed in EHS

For over thirty years, Quantum has served the EHS market with "no-hassle" software solutions that reduce risk and create cost-saving efficiencies in GHS compliance. What differentiates us is the combination of our understanding of the global chemical industry with our smart technology. We work with Fortune 500 companies as well as small to mid-sized corporations around the world. Our diverse team of safety professionals, talented developers, and managing leaders all work in sync to provide you a custom solution. Contact us today via info@usequantum.com to see how we might support you.
